

JomBoss Open Issues Register

1. Purpose

This document tracks unresolved issues, risks, missing documents, and decisions that require follow-up.

Codex must check this file during every weekly PA review.

An issue should remain open until it is either:

1. Resolved
2. Reclassified
3. Moved into the decision log
4. Marked as no longer relevant

2. Risk Levels

Use these risk levels:

Risk Level	Meaning
Critical	Could block investment, grant approval, legal compliance, or company ownership clarity
High	Important and should be resolved soon
Medium	Relevant but not urgent
Low	Useful to resolve later

3. Status Labels

Use these status labels:

Status	Meaning
Open	Not yet resolved
In Progress	Work has started
Waiting	Waiting for another person or external input
Needs Review	Draft exists but needs checking

Status	Meaning
Resolved	Completed
Archived	No longer relevant

4. Open Issue Template

Use this template for each issue:

```
## Issue: [Short title]

**Date Opened:** YYYY-MM-DD
**Risk Level:** Critical / High / Medium / Low
**Status:** Open / In Progress / Waiting / Needs Review / Resolved / Archived
**Owner:**

[Fill only when resolved.]

5. Current Open Issues

Issue: Confirm Current Cap Table

Date Opened: 2026-06-18

Risk Level: Critical

Status: Open

Owner: G

Related Files:

- 02_FOUNDERS_GOVERNANCE/CAP_TABLE.md

Issue Description

JomBoss needs a clean and current cap table showing shareholders, number of shares, percentage ownership, and any future equity obligations.

Why It Matters

Investors, accelerators, and grant panels may ask who owns the company. Without a clear cap table, JomBoss may appear disorganised or legally risky.

Current Evidence

Company incorporation documents may contain shareholder information, but these have not yet been organised into the data room.

Missing Information

1. Current shareholders
2. Share percentages
3. Number of shares
4. Any founder equity agreements
5. Any promised equity or informal commitments
6. Any competition-related equity or warrant exposure

Next Action

Create `02_FOUNDERS_GOVERNANCE/CAP_TABLE.md`.

Deadline

To be confirmed.

Issue: Confirm Current Team and Founder Roles

Date Opened: 2026-06-18

Risk Level: Critical

Status: Open

Owner: G

Related Files:

- 01_COMPANY/CURRENT_TEAM_REGISTER.md
- 12_ARCHIVE/old_pitch_decks/

Issue Description

Old JomBoss pitch decks and documents may show different team members and C-suite titles from the current operating reality.

Why It Matters

Inconsistent team information can create investor confusion and potential founder or IP disputes.

Current Evidence

Older decks list historical roles. Current active leadership appears to be G, Aria, and Sze Ching, but this must be formally confirmed.

Missing Information

1. Current active founders
2. Current directors
3. Current shareholders
4. Current core team
5. Historical but inactive members
6. Who has legal rights or obligations
7. Who should appear in investor materials

Next Action

Create `01_COMPANY/CURRENT_TEAM_REGISTER.md`.

Deadline

To be confirmed.

Issue: Founder Agreement Missing

Date Opened: 2026-06-18

Risk Level: Critical

Status: Open

Owner: G

Related Files:

- 02_FOUNDERS_GOVERNANCE/FOUNDER_AGREEMENT_DRAFT.md

Issue Description

JomBoss needs a founder agreement or equivalent governance document clarifying roles, equity, responsibilities, decision-making, IP, vesting, resignation, and dispute handling.

Why It Matters

A missing founder agreement is a major due diligence red flag.

Current Evidence

Founder roles have been discussed informally, but no final signed agreement is currently recorded in the data room.

Missing Information

1. Founder obligations
2. Equity ownership
3. Vesting or no vesting position
4. Decision-making process
5. IP ownership
6. Exit or resignation treatment
7. Dispute process

Next Action

Draft 02_FOUNDERS_GOVERNANCE/FOUNDER_AGREEMENT_DRAFT.md .

Deadline

To be confirmed.

Issue: IP Assignment Missing

Date Opened: 2026-06-18

Risk Level: Critical

Status: Open

Owner: G

Related Files:

- 08_INTELLECTUAL_PROPERTY/IP_ASSIGNMENT_TRACKER.md

Issue Description

JomBoss needs to confirm whether all founders, developers, designers, interns, talents, and contractors have assigned relevant IP to the company.

Why It Matters

JomBoss's value depends on its brand, platform, SOPs, pitch materials, client work, and internal systems. If contributors own parts of these assets personally, investors may see this as a serious risk.

Current Evidence

Some materials were created by founders and team members, but formal assignment status is not yet recorded.

Missing Information

1. Who created the logo
2. Who created the website
3. Who created the platform code
4. Who created SOPs
5. Who created pitch decks
6. Who created client deliverables
7. Whether written IP assignments exist

Next Action

Create `08_INTELLECTUAL_PROPERTY/IP_ASSIGNMENT_TRACKER.md`.

Deadline

To be confirmed.

Issue: Revenue Claims Need Verification

Date Opened: 2026-06-18

Risk Level: Critical

Status: Open

Owner: G

Related Files:

- 03_FINANCIALS/MONTHLY_REVENUE_TRACKER.csv
- 03_FINANCIALS/CLIENT_REVENUE_LEDGER.csv
- 03_FINANCIALS/evidence/

Issue Description

JomBoss claims revenue traction, but each figure must be matched against invoices, payment proof, and bank records.

Why It Matters

Unsupported revenue claims can damage investor trust.

Current Evidence

JomBoss has stated approximate revenue metrics, but the source evidence has not yet been fully organised in the data room.

Missing Information

1. Monthly revenue by date
2. Revenue by client
3. Invoice records
4. Payment proof
5. Bank statement evidence
6. Treatment of deposits and credits
7. Recognition of completed vs prepaid work

Next Action

Create financial trackers and upload evidence.

Deadline

To be confirmed.

Issue: Talent and PM Agreements Missing

Date Opened: 2026-06-18

Risk Level: High

Status: Open

Owner: G

Related Files:

- 07_TALENT_PM_SYSTEM/TALENT_AGREEMENT_TEMPLATE.md
- 07_TALENT_PM_SYSTEM/PM_AGREEMENT_TEMPLATE.md

Issue Description

JomBoss needs written agreements for talents and PMs covering scope, payment, confidentiality, IP, conduct, substitution, reporting, and dispute handling.

Why It Matters

JomBoss depends on student talents for execution. Without proper agreements, there may be IP, confidentiality, payment, employment classification, and delivery risks.

Current Evidence

The PM model and talent workflow exist as operating concepts, but agreement templates are not yet finalised.

Missing Information

1. Talent agreement terms
2. PM agreement terms
3. Payout policy
4. IP assignment
5. Confidentiality
6. Reporting duties
7. Substitution duties
8. Grievance process

Next Action

Draft talent and PM agreement templates.

Deadline

To be confirmed.

Issue: Credit System Legal Position Needs Summary

Date Opened: 2026-06-18

Risk Level: High

Status: Open

Owner: G

Related Files:

- 09_LEGAL_COMPLIANCE/CREDIT_SYSTEM_LEGAL_POSITION.md
- 05_SERVICES_PRICING/CREDIT_SYSTEM_POLICY.md

Issue Description

JomBoss uses credits as service entitlement, but the legal position should be summarised clearly to avoid confusion with e-money, stored value, refunds, or transferable value.

Why It Matters

The credit system is central to JomBoss's pricing and operations. If misunderstood, it could create client disputes, accounting confusion, or regulatory risk.

Current Evidence

Internal notes state that credits are not cash, not stored value, not refundable, not transferable, and only represent prepaid services.

Missing Information

1. Final client-facing credit wording
2. Internal accounting treatment
3. Expiry policy
4. Refund policy
5. Bonus credit treatment
6. Legal review

Next Action

Create `09_LEGAL_COMPLIANCE/CREDIT_SYSTEM_LEGAL_POSITION.md`.

Deadline

To be confirmed.

Issue: Product Source Code Ownership and Access

Date Opened: 2026-06-18

Risk Level: High

Status: Open

Owner: Aria / G

Related Files:

- 08_PRODUCT_PLATFORM/REPOSITORY_OWNERSHIP_SUMMARY.md
- 08_PRODUCT_PLATFORM/SOURCE_CODE_ACCESS_RECORD.md

Issue Description

JomBoss must confirm that the company owns or has proper rights to use, modify, and maintain the platform source code.

Why It Matters

If the platform is part of the investment story, investors will ask whether the company owns the code and has access to the repository, hosting, domain, and deployment environment.

Current Evidence

Platform development is ongoing or planned, but ownership and access records are not yet organised.

Missing Information

1. Repository location
2. Repository owner
3. Admin access
4. Developer contributors
5. IP assignment
6. Hosting access
7. Domain access
8. Deployment process

Next Action

Create product repository ownership summary with Aria.

Deadline

To be confirmed.
